

Kalman system estimates: fixed omega vs bounded free omega, 1983–2017

Nest	Sigma fixed	Sigma free	Omega fixed	Omega free	rho fixed	rho free	Delta sigma	Delta NLL	Conv. fixed	Conv. free
Tur vs Tje	0.100	0.100	0.153	0.303	0.980	0.980	0.000	0.85	Yes	Yes
TurTje vs Var	1.004	2.500	0.516	0.445	0.802	0.810	1.495	−17.97	Yes	Yes
TurTjeVar vs Ene	2.500	2.500	0.998	0.848	0.809	0.809	0.000	−68.72	Yes	Yes
IkkeBol vs Bil	1.040	2.500	0.941	0.791	0.980	0.980	1.460	1.20	Yes	Yes

Note: Delta NLL = negative log-likelihood free omega minus fixed omega. Lower negative log-likelihood indicates better fit.
